THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

25X1

1. The Győr Textile Works (Győri Textil Művek N. V.), commonly called Györtex, is located on Fehérvári Street and across the freight railway station in the city of Győr (Y 44). The main offices of the plant are situated at Sándor Wekerle Street 10, Budapest.
2. Officers of the plant are:
 György Takács, manager, a former weaver's helper and an ardent Communist for many years.
 Alfred Singer, superintendent, a former employee of Györtex.
 Sándor Borbély-Blau, technical director, a textile engineer.
 Aladár Thun and József Kárpáti, assistants of Borbély-Blau, textile engineers.
3. Györtex employs about three thousand people, of whom about four hundred are officials and party functionaries, two thousand are skilled workers, and six hundred are helpers. Seventy per cent. of the employees are women. The Picano department operates only one shift; the finishing, bleaching, and dyeing shops have three shifts which begin to work at 6:00 a.m., 2:00 p.m., and 10:00 p.m.
4. The plant operates with a single electric power plant, which was modernized in 1949-50. The power plant also supplies electricity to the adjoining Grab textile works and Richard Richards cloth works. It is known that the dynamos of this power plant are driven by steam turbines. The coal for these comes from the mines at Tata. A supply of 15-20 carloads of coal is always on hand in the coal bunkers of the factory.

5. The plant gets its supply of cotton yarn from the Győr state spinning mill (Győri Állami Fonoda); silk yarn from the spinning mill at Kalocsa, and tow from somewhere in Budapest.
6. Pure linen is not produced, but bedding and sheets, diapers, molino, georgette, lining material, and tent material for military use. The last was formerly made of silk parachute cloth, but lately also of a yellowish artificial silk.
7. There are 225 looms, which were installed between the end of the war and 1950. They were delivered from Germany.
8. The daily output amounts to a carload of finished goods. Everything is shipped to Budapest by railway or motor truck, where it is further processed in the Obuda Bleachery (Obudai Fehéritő N. V.). Most of the chemicals for Győrtex are supplied by the (Hungaria Vegyiművek) and the Textile Chemical Industries (Textil Vegyiszer Művek, formerly Blum and Co.), of Budapest.
9. The Győrtex works are registered on the war industries list as class "B". The factory thus does not have the status of a defense plant and comes under the regulations of the five-year plan. The employees can be called up in case of mobilization.*
10. The plant has a civilian air-defense section which is also trained for defense against atomic weapons. The factory has air-raid shelters.

Enclosure: A sketch map of Győr Textile Works, 1 page.

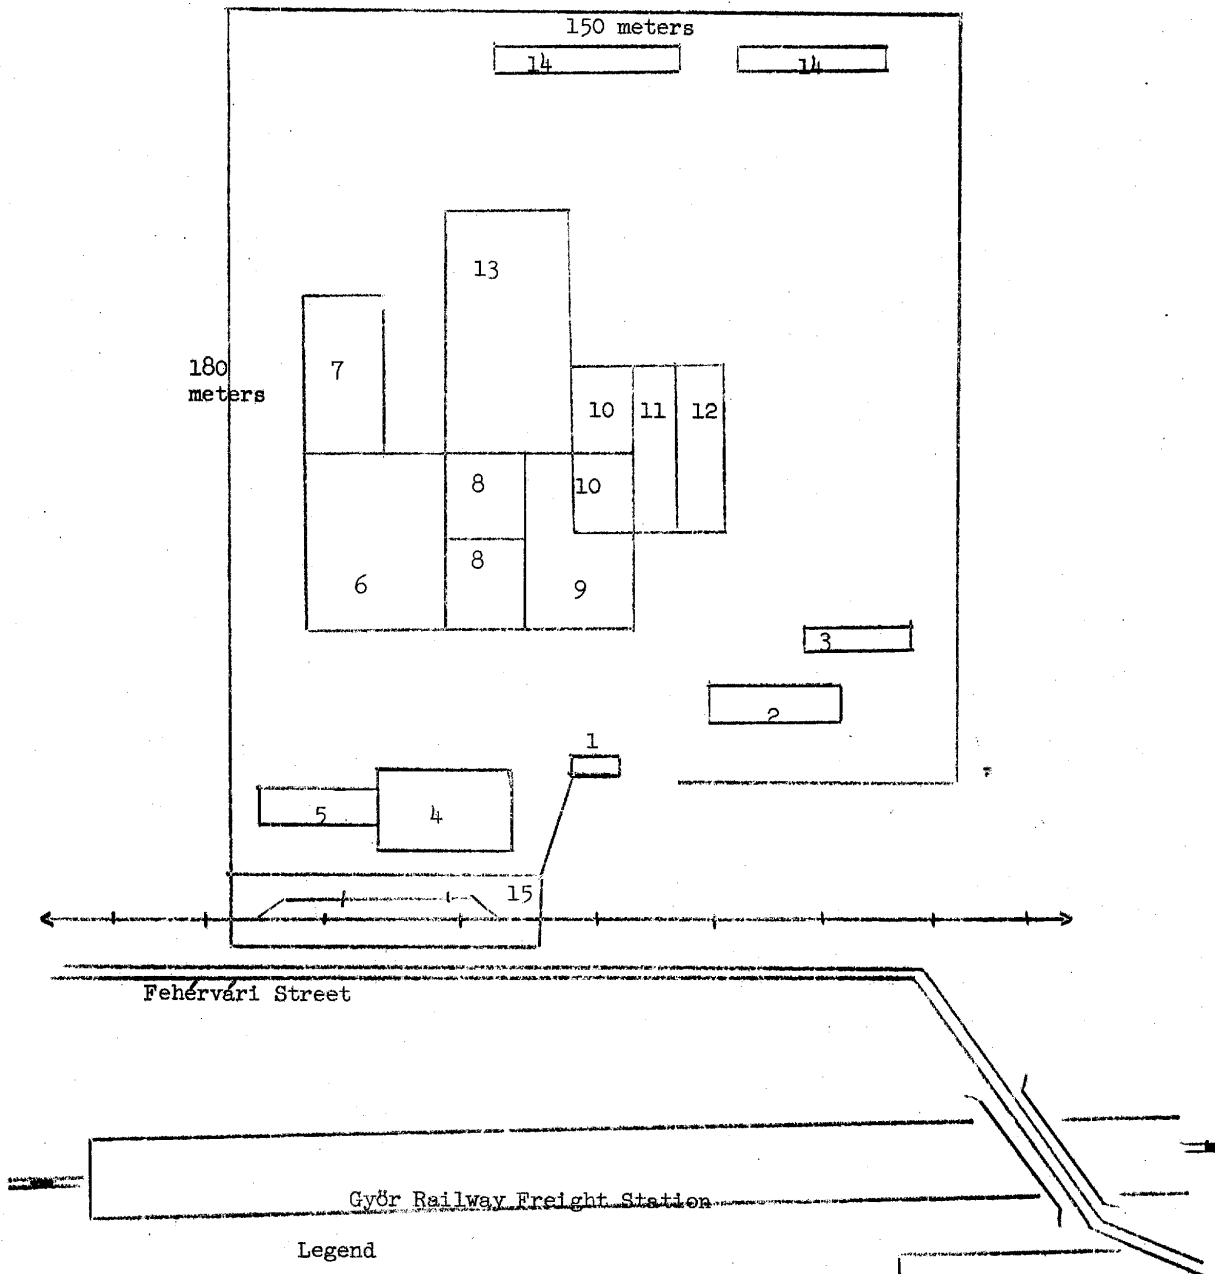

25X1 * Comment: Class "A" plants keep their employees in case of mobilization, and only those must report whose induction notices are inscribed, "Must report, without consideration of possible dismissal."
